Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Monica is interested in finding a treasure but the key to opening is to get the sum of the main diagonal elements and secondary diagonal elements.

Write a program to help Monica find the diagonal sum of a square 2D array.

Note: The main diagonal of the array consists of the elements traversing from the top-left corner to the bottom-right corner. The secondary diagonal includes elements from the top-right corner to the bottom-left corner.

Input Format

The first line of input consists of an integer N, representing the number of rows and columns.

The following N lines consist of N space-separated integers, representing the 2D array elements.

Output Format

The first line of output prints "Sum of the main diagonal: " followed by an integer, representing the sum of the main diagonal.

The second line prints "Sum of the secondary diagonal: " followed by an integer, representing the sum of the secondary diagonal.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 3

1 2 3

4 5 6

7 8 9

Output: Sum of the main diagonal: 15

Sum of the secondary diagonal: 15

Answer

```
import java.util.*;
class main
{
    public static void main(String[] args)
    {
        Scanner sc=new Scanner(System.in);
        int n=sc.nextInt();
        int[][] a=new int[n][n];
        for(int i=0;i<n;i++){
            for(int j=0;j<n;j++){
                a[i][j]=sc.nextInt();
            }
        }
        int md=0,sd=0;
        for(int i=0;i<n;i++){
            for(int j=0;j<n;j++){
                if(i==j){
                    md+=a[i][j];
                }
            }
        }
        for(int i=0;i<n;i++){
            for(int j=n-i-1;j>=0;j--){
                sd+=a[i][j];
            }
        }
        System.out.println("Sum of the main diagonal: "+md);
        System.out.println("Sum of the secondary diagonal: "+sd);
    }
}
```

```
    }
    if(i+j==n-1){
        sd+=a[i][j];
    }
}
System.out.println("Sum of the main diagonal: "+md);
System.out.print("Sum of the secondary diagonal: "+sd);
}
```

Status : Correct

Marks : 10/10
